Principles for Responsible Investment

PUBLIC TRANSPARENCY REPORT

2023

Society of Swedish Literature in Finland

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

Why does your organisation engage in responsible investment?

• What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

SLS works with publishing, archiving, research funding and wealth management. We support humanities and social science research and promote Finland-Swedish literature through prizes and scholarships. SLS is one of the largest managers of assets for the public good in Finland. Our activities are made possible by private donations.

SLS's values are knowledge, quality, renewal and diversity. The values are visible in and support our work on responsible investment: through greater knowledge, high quality, constant renewal and consideration of diversity, we also achieve goals linked to sustainability. SLS wants to act sustainably and develop responsibility both in respect of investments and in its day-to-day operations.

We strive to generate good overall returns in the long term, in order to enable future generations to benefit from our grants and funding. We consider responsible investment to be a natural part of a long-term perspective. Companies equipped to identify requirements and opportunities for a sustainable future are more successful in the long term. Responsible investment is also risk management as companies that act responsibly can be expected to face fewer risks in their business activities. Responsible investment also extends to the selection of investment funds and external asset managers. We strive for continuous collaboration with both asset managers and other investors in order to advance our responsible investment operations.

SLS joined the PRI initiative in 2021. By signing the six principles of the initiative, we undertake to continue to emphasise environmental, social and governance issues in our investment activities. The initiative serves as a tool for the continued development of our responsible investment strategy. In addition, SLS is a member of Finsif, Finland's Sustainable Investment Forum.

The Financial Board has established SLS's principles for responsible investment. The principles describe how ESG aspects are integrated into investment decision-making, including the selection of thematic and impact investments, and specific sector exclusions for weapons and tobacco. The principles also cover active ownership and engagement, and monitoring of the investment portfolio's responsibility.

Responsible operations are always built on transparency. Our annual sustainability report presents our principles and how these have been reflected in our investment activities.

Section 2. Annual overview

Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.

Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):

- · refinement of ESG analysis and incorporation
- stewardship activities with investees and/or with policymakers
- collaborative engagements
- attainment of responsible investment certifications and/or awards

In accordance with SLS's responsible investment principles, we work with actors which have committed to incorporating responsibility considerations in their investment activities. At the end of 2022, 99% of the externally managed assets in the portfolio were managed by partners who have also signed the PRI. As categorised by the EU's Sustainable Finance Disclosure Regulation (SFDR), SLS strives to invest primarily in funds categorised as Article 8 or 9. In 2022, the portfolio was comprised of 13% Article 9 funds, 67% Article 8 funds, and 20% other funds.

The level of responsibility in the portfolio is assessed annually through a comprehensive analysis performed by our partners. In 2022, 71% of the investments in the portfolio were included in the responsible investment analysis. The average level of responsibility in SLS's liquid investments showed continued positive development in 2022. The portfolio's ESG score rose by 4% compared with 2021. The portfolio's ESG score of 7.7 grants it the second highest sustainability rating of AA, whilst the market average (MSCI All Country World index) has the rating A (6.7). The portfolio's ESG score is 15% higher than the market average, which means that the portfolio companies' management of risks and opportunities related to responsibility outperformed the market average.

An important key metric for evaluation of portfolio performance in terms of climate issues is the measurement of carbon dioxide emissions from investments in the portfolio. The carbon footprint of SLS's equity investments is at the same level as in 2021. In 2022, the carbon footprint of our equity investments was 18% lower than the market average. The equity investments' carbon intensity indicators are also significantly below the market average.

In addition to the backward-looking perspective provided by the carbon footprint, it is also important to have a forward-looking approach to climate work. The analysis of the portfolio showed that 88% of the companies in SLS's equity portfolio are committed to reducing their emissions. 69% of the companies have set ambitious targets to be carbon neutral by 2050. We also invest in themed funds focusing on companies that produce solutions for energy efficiency, renewable energy or other environmentally related operations.

SLS's real estate portfolio consists of real estate funds and direct property investments in both residential/commercial real estate and property companies, amongst others. Evaluations of the properties' environmental impact began in 2022 with preliminary BREEAM studies of two office buildings as well as energy audits of five residential buildings. We will proceed from the results of the studies and surveys to take concrete measures for the energy efficiency of properties, such as the 2023 renewal of the building automation in an office building.

In accordance with the SLS Principles for Responsible Investment, active ownership is exercised through, e.g., participation in and voting at general meetings. SLS's active ownership focuses on Finnish directly-owned companies. In 2022, we participated in advance voting at the general meetings of 9 of our directly-owned companies. Our external asset managers have their own processes for active ownership and engagement with companies.

Section 3. Next steps

What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Responsible investment is a constantly evolving area that is further incentivised by EU-driven sustainability regulation. At the same time, more and more tools are becoming available to investors. In spring 2023, we created a new position for responsible investment, with the aim of increasing the resources available for our sustainability efforts. Through this appointment we seek to further strengthen the significance of sustainability in our investments.

In 2023, we will update our responsible investment principles. In the update we will include sustainability objectives and describe our asset class specific approaches more in-depth. The purpose is also to include climate change related targets and activities. In addition, our principles on active ownership and engagement will be revised.

The updated responsible investment principles will lead to the adoption of new tools and processes within our investment activities. We will continue collaboration with both asset managers and other investors in order to advance our responsible investment objectives.

Does your formal responsible investment policy(ies) identify a link between your responsible investment activities and your fiduciary duties or equivalent obligations?

(A) Yes

Elaborate:

SLS has a long-term investment approach. We strive to generate good overall returns in the long term, in order to enable future generations to benefit from our grants and funding. We consider responsible investment to be a natural part of a long-term perspective. Responsible investment is also risk management; companies that act responsibly can be expected to be more successful and face fewer risks in their business activities.

SLS's values are knowledge, quality, renewal and diversity. The values are visible in and support our work on responsible investment: through greater knowledge, high quality, constant renewal and consideration of diversity, we also achieve goals linked to sustainability.
